AMIT KUSHWAHA

Aspiring Data Analyst | AI & ML Undergraduate

9229915604 | amit2272006@gmail.com | Noida, Uttar Pradesh | linkedin.com/in/amitkushwaha227 | github.com/amitkumar227

CAREER OBJECTIVE

BCA (Hons) student specializing in AI & ML at Galgotias University, seeking a Data Analyst internship to apply strong skills in SQL, Power BI, Python, and statistical analysis. Skilled at turning raw data into clear, actionable insights through data cleaning, visualization, and exploratory analysis — with a machine learning background that adds analytical depth beyond standard reporting.

EDUCATION

Bachelor of Computer Applications (Hons – AI & ML) *Currently Pursuing*

Galgotias University, Greater Noida, Uttar Pradesh

CERTIFICATIONS

- Power BI – Data Visualization & Business Intelligence (Microsoft Learn)
- Machine Learning – Model Training & Evaluation (Coursera / NPTEL)
- Natural Language Processing (NLP) (Coursera / NPTEL)
- AI in Healthcare (Skill India · Microsoft, 2026)

TECHNICAL SKILLS

Data Analysis & BI: SQL, Power BI, DAX, Excel, Data Visualization, Statistical Analysis, Data Cleaning & Preprocessing

Languages: Python, SQL, Java, C, C++

Data Science & ML: Machine Learning, Deep Learning, NLP, Pandas, NumPy, Scikit-learn, XGBoost, SHAP, SMOTE, ARIMA, Keras, NLTK, SpaCy

Databases: MySQL, DBMS, Relational Databases, Data Modeling, Query Optimization

Tools & Platforms: Power BI, Excel, TensorFlow, Git, VS Code, Google Colab, Jupyter Notebook, Streamlit, Optuna

TECHNICAL EXPERIENCE

Retail Sales Performance Dashboard *SQL · Power BI · Excel | 2026*

Interactive BI dashboard turning raw retail sales data into revenue and profitability insights

- Queried and cleaned a multi-thousand-row retail sales dataset in SQL (joins, aggregations, window functions) to build an analysis-ready data model.
- Designed an interactive Power BI dashboard with custom DAX measures for revenue, profit margin, and regional performance, letting stakeholders filter by category, region, and time period.

Exploratory Data Analysis: E-Commerce Customer Behavior *Python · Pandas · Seaborn | 2026*

End-to-end EDA uncovering purchase patterns and churn signals from transactional data

- Cleaned and structured a public e-commerce transactions dataset with Pandas, handling missing values, duplicates, and data-type inconsistencies.
- Analyzed customer segments and purchase trends with Matplotlib/Seaborn visualizations, translating findings into actionable business recommendations.

Liver Disease Prediction System *Python · ML · Streamlit | 2025–26*

End-to-end ML pipeline + deployable web app for clinical liver disease risk assessment

- Cleaned and preprocessed the UCI Indian Liver Patient Dataset (ILPD), applying SMOTE to correct class imbalance, then trained and evaluated XGBoost and Stacking Classifier models, achieving ~88% accuracy.
- Applied SHAP to explain model predictions and surface key risk drivers; used Optuna for automated hyperparameter tuning, cutting manual search time by ~60%.
- Deployed the model as an interactive Streamlit dashboard for real-time, data-driven risk assessment from patient inputs.

Additional Projects:

- General Health Prediction System (Python, AI/ML, 2025): Cross-validated a multi-condition classification model (Logistic Regression, Random Forest, SVM) with feature engineering and a Scikit-learn preprocessing pipeline.
- Weather Forecasting Model (Python, Time-Series, 2024–25): Applied ARIMA and regression to forecast temperature/precipitation trends; ran stationarity testing (ADF) and visualized results with Matplotlib/Seaborn.
- Bank Management System (C++, SQL, 2024): Designed a relational banking database and console app; wrote SQL queries (joins, subqueries, aggregations) for transaction management.

ADDITIONAL SKILLS & INTERESTS

Competitive Programming: 90+ problems solved on LeetCode (Arrays, Strings, DP, Trees); 50+ across HackerRank / CodeChef

Soft Skills: Leadership, Team Management, Communication, Event Planning, Marketing

Creative: Photography (8+ years)

Interests: Data-Driven Problem Solving, Business Analytics, Artificial Intelligence, Emerging Technologies
